

**HELP!
MY SAFETY SWITCH
HAS TRIPPED**

Now that you've confirmed that you're facing an issue with a tripped safety switch, here's an in-depth look at the initial fault-finding steps to take to restore power to the circuit.

South Coast Electrical Solutions Pty Ltd
Phone 0404 157 330
Electrical License: 188644C
Master Cabler License: A008229
ABN 17119197465

Faulty Installation, Defective Safety Switch or Other Issue. Call South Coast Electrical Solutions 0404 157 330

The initial tripped circuit may have been caused by a temporary fault in an appliance or a disruption in the power supply. Keep a note of the time the trip occurred and what appliances were being used. This will help the electrician fault find if it happens again
